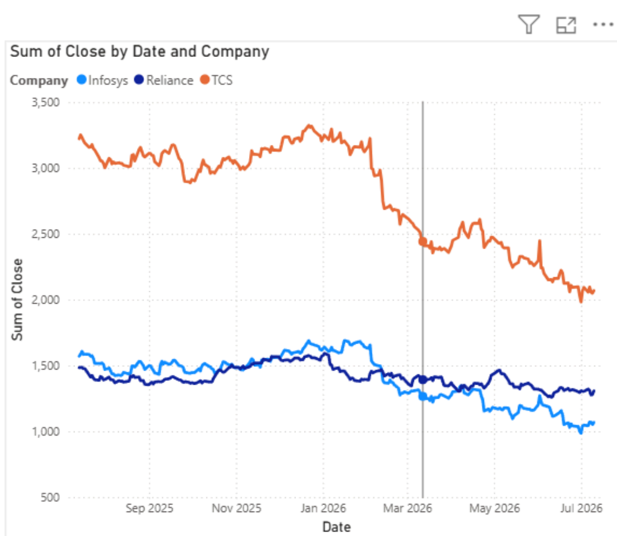
Stock Market Performance Analysis Report

Companies Analyzed: Tata Consultancy Services (TCS), Reliance Industries, and Infosys.
Period: July 2025 - July 2026

1. Executive Summary

This report evaluates the one-year historical performance and current valuation metrics of three major Indian large-cap equities: TCS, Reliance Industries, and Infosys. By analyzing their price trends, market capitalization, price-to-earnings (P/E) ratios, and recent market developments, this report provides a comprehensive overview of their stability and market position.

2. Visual Trend Analysis



Observation: Over the tracked 12-month period, all three stocks experienced a downward trend. The IT sector (TCS and Infosys) showed higher volatility and steeper declines, while Reliance Industries demonstrated a flatter, more stable price trajectory.

3. Key Performance Indicators & Valuations

Below is the updated financial standing of each company as of July 2026:

Company	Market Cap (Jul 2026)	P/E Ratio	1-Year Net Change	52-Week High	52-Week Low
TCS	₹7,40,896 Cr	14.80x	-35.80%	₹3,324.90	₹1,982.60
Reliance	₹1,731,754 Cr	18.11x	-11.86%	₹1,592.30	₹1,258.80
Infosys	₹433,899 Cr	14.72x	-31.99%	₹1,689.80	₹985.30

4. Recent News & Market Drivers

- **Tata Consultancy Services (TCS):** In July 2026, TCS reported strong Q1FY27 results with a 5% year-on-year increase in consolidated net profit and a 14% rise in revenue. The company successfully scaled its AI business to a $2.6 billion annualized run rate and declared an interim dividend of ₹12 per share.
- **Reliance Industries:** The stock has seen a mild recovery recently, acting as a defensive play against broader market selloffs. Investors are closely awaiting their scheduled Q2 2026 earnings release on July 22, 2026.
- **Infosys:** Shares saw a notable surge in July 2026, driven by a positive spillover effect from TCS's strong earnings, which eased market fears of a slowdown in IT spending. Infosys continues to position itself heavily as an AI-led transformation partner.

5. Conclusion

The data indicates that while the IT sector faced significant downward pressure over the past year, recent earnings reports show that demand for AI and digital transformation remains robust. Both TCS and Infosys have similar, highly attractive P/E valuations compared to their historical averages. However, Reliance Industries remains the most stable anchor asset among the three, boasting a massive ₹17.3 Trillion market cap and significantly lower 1-year price depreciation.
